- English, Hindi, Telugu

PROFESSIONAL EXPERIENCE

◆ Senior Software Engineer

[Dhan AI](#) | July 2022 - Present

- Developed multiple robust, scalable, modular, and API-centric internal and real-time applications with Typescript/Node JS.
- Engineered System Design, Architecture, and Infrastructure according to business needs for apps with 50K+ real-time users.
- Led technical upgrade projects for clients by working and coordinating with consultants and developers for feature updates.
- Mentored junior engineers, providing guidance on development strategies and education on innovative development techniques.
- Coordinated efficient large-scale software deployments

◆ Software Development Engineer

[Dhan AI](#) | April 2020 - July 2022

- Developing a Health Care Conversational AI using Rasa, Microsoft Bot Framework with custom NLP components.
- Designed and developed custom components to build a codeless chatbot development platform using Bot framework.
- Wrote highly maintainable, solid code for Chatbots Dashboard, forming a core framework and earning consistent praise from subsequent developers and clients since the initial version.
- Led Chatbot development team as Subject Matter Expert and primary point-of-contact for the team.

◆ Python Developer Intern

[Synopsys](#) | Sep 2019 - April 2020

- Coordinated with hardware and system engineering leads to gather data of different servers and wrote APIs to insert this data into Elastic Search Database for each time interval.
- Applied change control best practices to Dashboard development processes using Dash and Flask to provide software enhancements without disruptions for end users.
